Accepted file types

Accepted file types that the application can read and open:

- jpg
- jpeg
- png
- gif
- tiff

An error will display on the screen if the wrong file type is dropped onto the application.

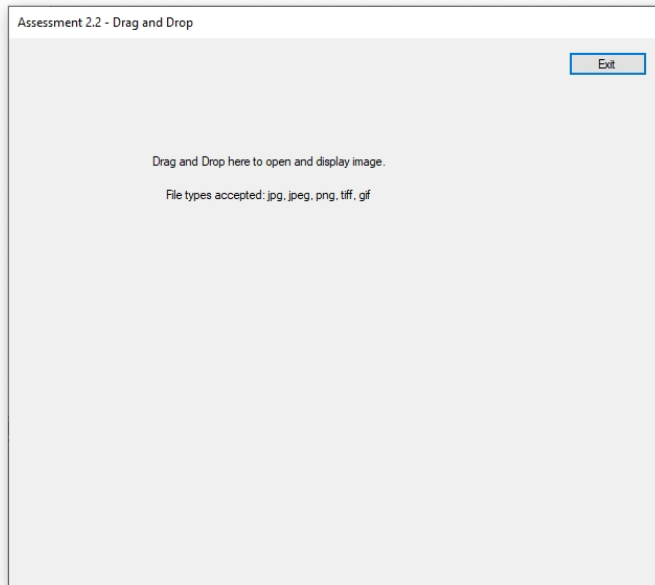

There is capability for more file types to be added in the future if requested.

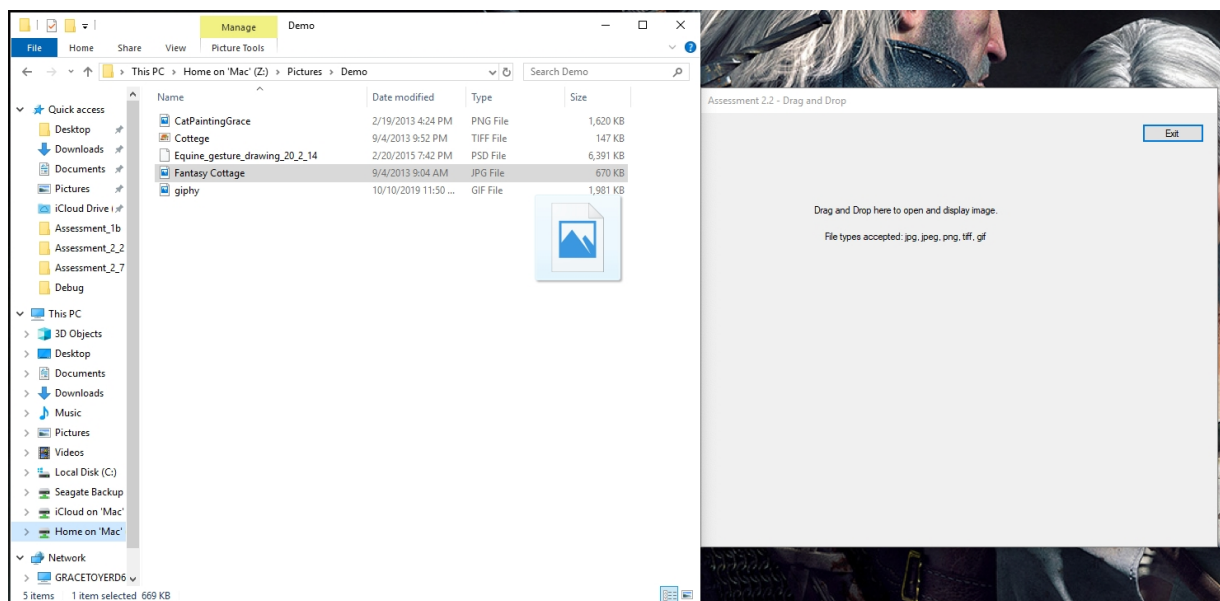

Opening a file

How to open a file:

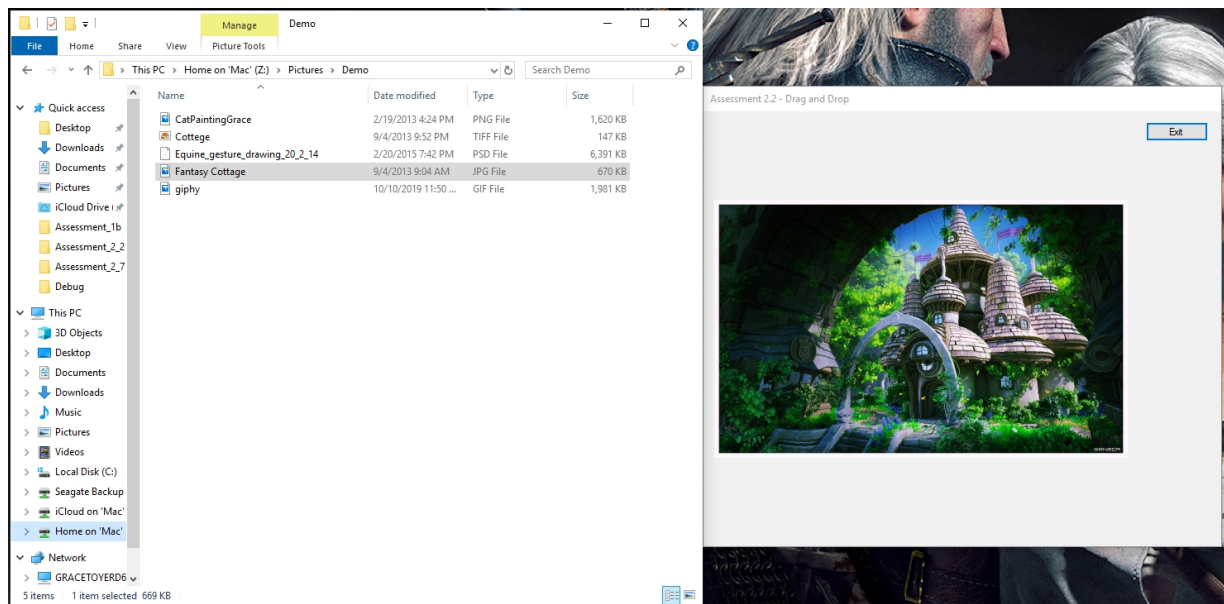

Step 1: Open the application.

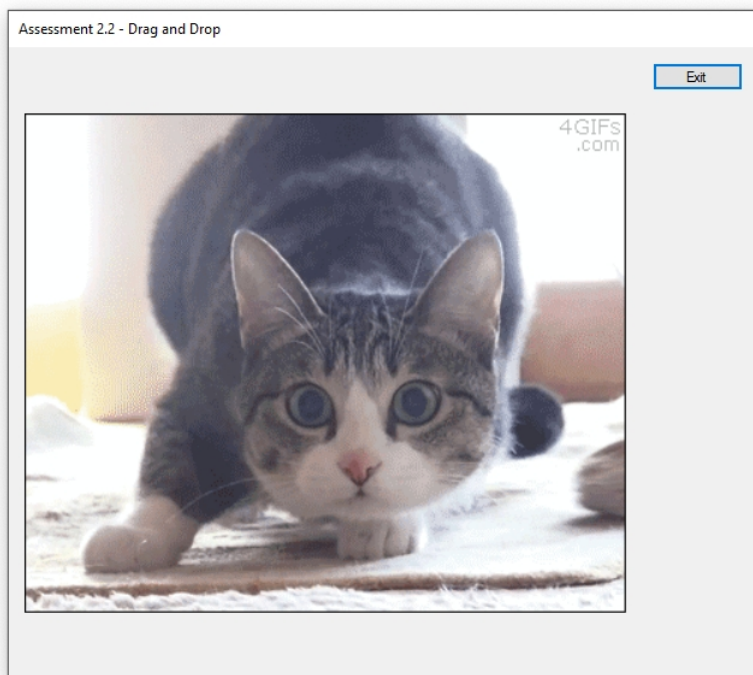

Step 2: Click and drag your chosen file (must be an accepted type) from the file explorer onto the application.

Step 3: Let go of the mouse click. Your file should now be open in the application.

Step 4: To open another image just repeat steps 2-3 and your new image will display.

Exiting the program

How to exit the program

Either click the exit button on the top right corner of the application or hit the escape key on the keyboard.
